

## **ABSTRACT**

*I studied 21 drawings with the theme "My House" realised by 18 kindergarten children from a kindergarten in the town of Dej, Cluj County, Romania. I realised the research during the 2013-2014 school year, analysing the houses drawn by 4-5 years old, 5-6 years old, and 6-7 years old children, considering these drawings as spatial representations. I also analysed the same drawn houses from a psychological perspective.*

**Keywords:** *the house test, drawing, space, castle, block of flats.*
